## PROJECTS

HuntAR: is a horror survival game set in a post apocalyptic future. Using geolocation players are forced to range further and further from their home to gather the supplies they need to survive and the equipment they need to power up. However, world isn't a safe place and users regularly face off against enemies in exciting Augmented Reality combat.

## EXPERIENCE

### D.R. Horton

Project Manager

- Led cross-functional vendors through an end-to-end project lifecycle from planning through home occupancy. Manage project schedules, identifying risks and clearly communicating goals to vendors. Direct the operations of the project while balancing cost, quality, inventory, planning requirements, and compliance.

### U.S. ARMY

Executive Officer

- Planned, coordinated, and conducted a comprehensive training program to prepare the organization for a variety of operations. Planned and led a multitude of combat and humanitarian operations while deployed in support of the withdrawal of U.S. forces in Iraq.
-
